

# UNFPA-UNICEF FGM Monitoring

Monitoring framework for the Joint Programme on Female Genital Mutilation

Sr. No	Indicator	Reporting Time	Status	Baseline	2014	2015	2016	2017	Source
G1	40% decrease in prevalence among girls 0-14 years in at least 5 countries (Number)	2014,2015,2016,2017	Planned						
G2	At least one country declaring total abandonment by the end of 2017 (Number)	2014,2015,2016,2017	Planned						
<b>Outcome 1 - Programme countries enact legal and policy frameworks for eliminating FGM/C which are appropriately resourced and l...</b>									
OC1.1	Number of countries implementing a comprehensive legal and policy framework to address FGM/C (Number)	2015,2016,2017,2014	Actual	0	0	1	1		#UNFPA/UNICEF Joint Annual Report, 2014, MGL Women, Amendment Act 2014
OC1.2	Number of countries with budget line to implement legislation and policies to eliminate FGM/C (Number)	2015,2016,2017	Actual	0	0	0	0		#Gambia Government, National Budget Estimates, 2014, #UNFPA/UNICEF Joint Annual Report, 2014
<b>Output 1.1 - Policy makers mainstream the commitment to end FGM/C throughout Government</b>									
OP1.1.a	Number of public policy statements on record to support the elimination of FGM/C (Also please list in the notes the specific names of all the laws, policies, etc. of each country, as applicable)	Q2 2017, Q3 2017, Q4 2017, Q1 2014, Q2 2014, Q3 2014, Q4 2014	Actual	3		3	0		
<b>Output 1.2 - Policy makers increasingly utilize disaggregated data and best practices to enforce law and implement evidence base...</b>									
OP1.2.a	Number of Joint Programme reports available and disseminated to policy makers and leaders on evidence, policy, costing related to programmes (Multi-indicators: # of documents, # of cases, # of events)	Q1 2014, Q2 2017, Q3 2017, Q4 2017, Q1 2014, Q2 2014, Q3 2014, Q4 2014	Planned			1	1		
OP1.2.b	Number of cases of enforcement of the FGM/C law (Multi-indicators: # of arrests, # Cases, # arrests to court)	Q1 2014, Q2 2017, Q3 2017, Q4 2017, Q1 2014	Planned						

- ### Features
- Facilitates reporting against core programme indicators
  - Document repository helps to link sources to data
  - Online and offline data entry
  - Easy generation of ready-to-print reports
  - Supports qualitative information / notes for each data value
  - Includes Calculation Engine for aggregation to a global framework

- ### Benefits
- One-stop shop for UN agencies, implementing partners, and government agencies to view data and enter programme information
  - Easy management of users and assignment of roles (administrators, data entry, normal users)
  - Collaborative process to enter data
  - Automatic aggregation of data (quarterly into annual, country into regional)
  - Integrates with social media

FGM Monitoring uses a di Monitoring framework to keep track of core indicators for the UNFPA-UNICEF Joint Programme on Female Genital Mutilation (FGM).

CSF's di Monitoring platform is a royalty-free, web-based monitoring system that allows agencies to report against their development plan. Since 2015, CSF has supported UNFPA and UNICEF in their effort to monitor progress against Female Genital Mutilation (FGM) by enhancing the di Monitoring system and helping to populate the framework with relevant indicators.

In 2016, CSF conducted capacity-building workshops with ten of the countries in the partnership, teaching UN and government focal points as well as implementation partners to populate their respective frameworks. The country frameworks for all 16 countries engaged in the Joint Programme were aggregated into a global framework via a Calculation Engine.

The CSF technical team has remained on call to address queries from all teams implementing the platform.

### Facts

Stakeholders	UNFPA and UNICEF
Geographic Area	WCARO, ESARO, MENA
Time Period	2015-2016
Topics	FGM, Gender
Tools	di Monitoring, software
