

MOE Guyana OpenEMIS Monitoring P2672

Strengthening the Monitoring of the 2022-2025 Education Sector Plan

Community Systems Foundation (CSF) assisted the government of Guyana to strengthen systems to monitor the Education Sector Plan through OpenEMIS Monitoring.

In the latest project in support to the Ministry of Education, Community Systems Foundation (CSF) provided software enhancements and advanced reporting options to ensure the Ministry is able to effectively monitor and report on Guyana's "Education Strategic Plan (ESP) 2021- 2025 - Vision 2030". The primary theme of the plan is to provide opportunities that ensure quality, equitable education that also focuses on live long learning.

Through the integration of OpenEMIS Monitoring into their education system, the main policy priorities will be monitored in an online, collaborative space where all Ministry personnel can access and contribute. Three of the main objectives focus on improving their governance and accountability, performance at all levels and efficiency of the education system.

Similarly, OpenEMIS Monitoring is being used to monitoring the Operational Plan that the Ministry has developed to achieve the ESP.

Features

- Monitoring dashboard to showcase results on the Education Sector Plan
- Online framework to monitor strategic benefits.
- Comprehensive reports tracking the progress being made towards achieving the goals in ESP 2021-2025.

Benefits

- Greater collaboration among different departments in the Ministry of Education
- Increased transparency around educational data
- Customised reports with indicators to monitor progress
