

League of Arab States Monitoring P1313

OpenEMIS Namibia Examinations Application, Capacity Building Trainings and Dashboard Development

The League of Arab States is using DFA Monitoring as a solution to monitor and report on progress against the Arab Regional Multidimensional Poverty Strategy.

As a tool to monitor the Arab States' Multidimensional poverty alleviation strategy, DFA Monitoring is being implemented at the regional level and is serving as a collaborative and reporting and monitoring platform.

To present the ongoing work, CSF was invited to a workshop hosted by the Jordanian Ministry of Social Development. With support from Economic and Social Commission of Western Asia (ESCWA), CSF presented DFA Monitoring as a Regional solution to Monitor and Report on Progress against Multidimensional Poverty.

CSF also conducted a capacity building training for country focal points and administrative users on the use of DFA Monitoring to monitor multidimensional poverty.

Features

- Regional monitoring of Multidimensional Poverty with DFA Monitoring
- Capacity Building workshops for administrative and country users

Benefits

- Collaborative and transparent monitoring using plans development in DFA Monitoring
