

AfghanInfo Multilingual Data Suite

A data management tool for the AfghanInfo mobile app

The multilingual data suite makes it easier to add data to the AfghanInfo mobile app, keeping it timely and relevant to policy-makers across the country.

Adding to the success of the mobile app, the 2017 project focuses on the inclusion of a robust database management system using the DFA data manager and enhancements to the existing dashboard and mobile application. These improvements allow for real-time updates within the mobile app and dashboard, making data dissemination dynamic and relevant. The system also includes advanced lab training for CSO / UNICEF staff so they may take full advantage of what the system has to offer.

Along with new tools, the entire suite has been upgraded with the inclusion of two new languages, Dari and Pashto. Introducing multilingual components into the program provides greater accessibility to all Afghan citizens, allowing for more inclusive policy decisions across Afghanistan.

Features

- User-friendly design to analyze data
- Real-time data update
- Comparison on map as well as different chart types
- Cross sectoral indicators available based on sector classifications
- Access to multilingual database through various tools

Benefits

- Most recent information on cross sectoral indicators are made available in real-time
- Highly interactive dissemination tools
- Data Analysis helps programmers/planners in pursuing effective strategies and plan target interventions.
- Updating data is made easy as and when available with the data manager
- Capacity building of admin users

Facts

Stakeholders	UNICEF, Afghanistan Central Statistics Office (CSO)
Geographic Area	Afghanistan
Time Period	2017
Topics	Socioeconomic Data
Tools	Database, Mobile App, Dashboard, Online Admin Tool
Services	App development, capacity building workshop, ongoing platform support, and maintenance
Links	devinfo.org/afghaninfo
Reference	Mona Korsgard mkorsgard@unicef.org
Project Admin	Christopher Tongbram cgtongbram@dataforall.org

Budget

USD	0.059 million
