

EthioInfo

Better monitoring of the SDGs

The EthioInfo Dashboard is Ethiopia’s new generation of data dissemination software for monitoring the Sustainable Development Goals.

EthioInfo provides a set of tools suited for easy data dissemination through intuitive visualizations. This includes maps and graphs, managed by a customizable online data manager to quickly facilitate the inclusion of new data. The interconnected dashboard, data manager, and database make the latest information publicly available, allowing users to better understand how the indicators are performing and subsequently create better policy. The platform is mobile-responsive, for use in remote areas.

Features

- Data available in the form of intuitive visualizations, graphs, and maps.
- Tools for enhancing the dissemination and use of statistical information and contributing to knowledge management

Benefits

- Available in English
- SDG data available on-the-go or during meetings
- Boosts utilization of statistics
- Potential to reach a wider population with increased penetration of mobiles
- Enhanced user experience

Facts

Stakeholders	UNICEF, Central Statistical Agency of Ethiopia
Geographic Area	Ethiopia
Time Period	2017
Topics	SDG
Tools	Database, Dashboard
Services	Database management
