

Sierra Leone Data Dissemination Suite

Powerful, easy-to-use data dissemination tools for development

Sierra Leone Info, developed by UNICEF and Statistics Sierra Leone, is a database and data dissemination tool for national monitoring and sound decision-making.

Sierra Leone Info combines a robust database management system with a suite of dissemination tools. The database is connected to three dissemination platforms: a dashboard, a mobile app, and the online DevInfo 7 adaptation. Each of these applications are easy-to-use data analysis, mapping, and visualization tools.

Sierra Leone Info is equipped with real-time data updating; any new information entered by users into the system will automatically be reflected on its interactive dissemination tools. CSF has been retained to provide ongoing maintenance and updates to the tool.

Features

- User-friendly design for accessible data analysis
- Real-time data updates for immediate availability of information
- Easy-to-use mapping, chart, and other visualization tools
- Supports cross-sectoral indicators
- Mobile app allows users to access data on their mobile phone

Benefits

- Highly interactive data dissemination tools
- Data Analysis helps programmers / planners pursue effective strategies and plan target interventions
- Real-time data update of dissemination tool

Facts

Stakeholders	UNICEF Sierra Leone
Geographic Area	Sierra Leone
Time Period	2016-2018
Topics	Sierra Leone Info data dissemination services
Tools	Dashboard, database, Mobile app
Services	In-country CB workshop; Database harmonization
