OpenEMIS Lesotho
Education Management Information Systems for Lesotho's children

Through OpenEMIS, the Ministry of Education and Training (MoET) in Lesotho is moving towards better education outcomes through timely and accurate sub-national data.

With assistance from UNICEF, the MoET is being guided by Community Systems Foundation in the development and implementation of OpenEMIS, providing access to real-time data to inform the Ministry on their priority areas. As outlined in the Education Sector Plan, this can include, but is not limited to, the state of literacy, examinations, repetition, dropout rates, and assessments. Through OpenEMIS, the MoET can address gaps in the education, provide better monitoring and transparency, and provide a robust decision support system for the country. This will help to ensure that existing education data is put to good use and that the implementation of OpenEMIS strengthens Lesotho's national capacities.

Features

- Collection individual student data
- Tracking student meals
- Seamless report card creation
- Management of Ministry staff
- Out of School Children tracking

Benefits

- Easy reporting
- Part of an open source community
- Stay up to date on latest education trends
- Enhanced user experience

Facts

Stakeholders	Ministry of Education and Training (MoET) Lesotho
