

SUN Indonesia- Knowledge Hub

Knowledge Repository and Indonesia's Nutrition Dashboard

Indonesia has some of the most troubling statistics on undernutrition in the world: over 9 million children are stunted, and there are an estimated 3 million cases of severe acute malnutrition every year.

Adolescent pregnancies, poor maternal nutrition, inadequate breastfeeding and feeding practices, and poor sanitation and hygiene are some of the most important underlying causes. Poor nutrition in early life is depriving children of healthy and fulfilling lives and the nation of a productive workforce.

CSF has been contracted to develop a CMS Knowledge management portal for Indonesia that will be a central repository of all information on nutrition in Indonesia and the indicators related to monitoring the same. The management portal has a dashboard helping the stakeholder track the nutritional status in Indonesia.

The portal is available at:
<https://cegahstunting.id/>

Features

- Knowledge Repository of all nutrition-based information
- Online Learning Programs
- Indonesia's Nutrition Dashboard available at regency level
- Mobile Responsive Website
- Nutrition Expert Interaction

Benefits

- Multilingual Website
- User friendly interface
- Easy access to important nutrition related indicators
- Nutrition Monitoring

Facts

Stakeholders	UNICEF
Geographic Area	Indonesia (up to Regency Level)
Time Period	2017- present
Topics	Nutrition
Tools	CMS Portal, Database and Dashboard
Reference	Ms. Sri Sukotjo, UNICEF sukotjo@unicef.org
Project Administrator	Isha Pathik ipathik@dataforall.org

Budget

USD 0.073 million
