Key Activity 1.1.6.3 - TB/HIV Partnership	UNDP/UNICEF	Health	SDG03

UNInfo is an online tool for planning, monitoring and reporting on national UN Development Action Frameworks and Business Operations Strategies (UNDAF + BoS).

UN Country Teams prepare Development Action Frameworks and Business Operations Strategies in order to implement activities that will accelerate national development priorities. They use results-based management to plan, cost, implement, monitor, and measure collaborative interventions with various stakeholders. These require clear indicators, time-bound targets, and clearly defined responsibilities for all stakeholders.

The UNInfo system serves to make national strategic frameworks more accessible, link them to data for monitoring, and help UN agencies coordinate their collaborative activities. The system also improves the visibility and accountability of UN initiatives, by making the UN's work at the country, regional and global level publicly accessible.

Features

- Tool monitors indicators according to pre-established baselines and targets
- Administration Module enables administrator to set the basic configurations for UNDAF/BoS
- Comprehensive national and global dashboards help visualize trends
- Canned reports output fixed formatted fields; Report Builder can be used to generate custom reports
- Cross-browser compatibility

Benefits

- Increases coordination and transparency among UN Agencies
- Improves effectiveness of UN agencies, with focus on Key Performance Indicators in a public, interactive dashboard; 3W map with focus on Key Activities
- Tool assembles multi-country UNDAF data relevant to the Sustainable Development Goals, targets and indicators

Facts

Stakeholders	UNDOCO
Geographic Area	Global
Time Period	2016-Ongoing
Topics	Results based Monitoring system
Tools	Monitoring tool, Dashboard, Reports, Portal, 3W Map
Services	Field Reference Group Meetings; Webinars
Link	http://uninfo.org/
Reference	Gina Lucarelli, UNDOCO
Project Administrator	Jeeveeta S. Agnihotri jsagnihotri@dataforall.org

Budget

USD 0.514 million
