IREPS Sudan
UNDAF Indicator Reporting System

IREPS is a web-based platform that facilitates monitoring and reporting on Sudan’s UNDAF. It serves as a one-stop shop for UN agencies, implementing partners and the government of Sudan to access socioeconomic data on the country and track information on development programme.

CSF’s di Monitoring platform is a royalty-free, web-based monitoring system that allows agencies to report against their development plans. In 2015, the U.N. Resident Coordinator in Sudan partnered with CSF to develop a solution for monitoring the country’s UNDAF (UN Development Action Framework). IREPS – the UNDAF Indicator Reporting System – uses the di Monitoring platform to facilitate reporting against the UNDAF framework.

IREPS is connected to the SudanInfo socioeconomic database to allow users to link UNDAF data to contextual indicators and enhance their analysis. A performance dashboard displays graphics in real time, with tools including a 3W map of activities as well as thematic maps and graphs showing locational outcomes of various programs.

IREPS includes a tool to create surveys and collect data using RapidPro SMS technology, making it possible to disseminate survey questions to community users and to remotely collect real-time information. SMS data populates a Mood Barometer on the IREPS dashboard that provides a quick, real-time summary of the public’s perception of specific issues relating to UNDAF pillars.

Features
- Supports UNDAF reporting against core programme indicators
- Data dashboards provides easy-to-understand budgetary and indicator information
- SMS Mood Barometer gives real-time summary of remotely collected survey data
- Generates ready-to-print reports
- Supports user-role management

Benefits
- One-stop shop for various agencies to view data and enter programme information
- Integrates SudanInfo database to link UNDAF data to national indicators
- Helps UN agencies and governments access data in a more effective manner

Facts
Stakeholders: UNDP Sudan
Geographic Area: Sudan
Time Period: 2015 - 2016
Topics: IREPS Sudan UNDAF Indicator Reporting System
Tools: Monitoring, Dashboard, RapidPro integration
Services: System Development, Training, Support & Maintenance
