

Sudan SDG Dashboard

[P0524]

Monitoring progress towards the Sustainable Development Goals

The Sudan SDG dashboard aims to display SDGs and socio economic data for monitoring and evidence based decision making.

The Sudan SDG dashboard dynamically pulls the data from the online SudanInfo database at www.devinform.org/sudaninfo and displays them using intuitive and interactive visualization. The data is easy to comprehend via well designed presentation objects and infographics. The indicators in the dashboard are displayed by SDGs as well as different sectors.

Features

- Data sets presented in a standard and easy-to-comprehend format
- Different sections aligned with SDGs
- Infographics provide visual data interpretation
- Intuitive and interactive interface for easy browsing
- Easy download tool for sharing information in reports

Benefits

- Reliable access to performance indicators for the SDGs at the Country, Regional and District level
- Data is intuitively understood, no training required
- Data analytics used to produce visualizations out of large volumes of data, to illustrate key trends and gaps
- Dynamic update using online data-manager

Facts

Stakeholders	UNICEF
